## LEGAL FILES' NEW RELEASES

Legal Files Software Inc. ([www.legalfiles.com](http://www.legalfiles.com)) released **Legal Files 6.0** and **MyLegalFiles 3.0**. Legal Files has multidistrict litigation functionality that allows users to create a "parent/child" relationship for files in multidistrict litigation. The Legal Files document assembly feature now is compatible with any Microsoft Word form package or PDF package on the market, including PDF form fillers and U.S. court forms. Microsoft Outlook 2003 e-mail integration is enhanced and includes a "Save to Legal Files" button on the Outlook toolbar that saves highlighted e-mails and attachments to the specific matter in Legal Files. MyLegalFiles 3.0 offers efficient and secure access for remote users to Legal Files data. Web users have access to fully functional calendars, documents, e-mail, notes, mail logs, phone logs, time slips and To-Do lists. MyLegalFiles is available in three modes: application, portal and client, depending on the needs of the user. The costs of these products are based on the number of user licenses required. Volume and nonprofit discounts are available. For additional information, call (800) 500-0537.
